Rationale for Using CS520 With 1/8" Plugs

- What is the Purpose for a Wireless Headset to a 1/8" Plugs?
 - MIC and Headphone most common connector is the 1/8" plug
 - Applications include connections to computer (Mic/HP) jacks, external sound cards, and RemoteHams ORB Control Device for remote radio control
 - CS520 is perfect and allows roaming within a 350 foot radius of computer or ORB Control Device
 - Headset provides comfort, great listening focus and transmit audio during ham radio contacts
 - Bonus feature of simultaneously conferencing of up to 3 additional headsets for Field Day, Contests or Show and Tell Demonstrations
- CS520 Cabling 1/8" Mic/HP Plugs is an Easy DIY Project

Connectivity

**CS520 Wireless Headset
Encrypted and 1900 GHz**

**Adapter Box
Wired Using
Drawing 4000-0030**

**Plugs Connects
To Sound Card with
1/8" Jacks**

**RJ45 to RJ45 Plugs
To Connect Base Unit
With Interface Box**

Schematic 4000-0030 Rev-A

NOTES

1. Cut Item #2 cable to length 60 inches from phone plug end. Use both halves for plug cables.
2. Pin 1 wire printed circuit trace must be cut so capacitor can be soldered in series with Pin 1. Cut through the trace on upper AND lower side of PCBA!
3. Add 2 jumpers wires to connect grounds together on circuit board, Pins 2-4-S (Shield)

Board Construction

(Shielded Breakout With Terminals)

Notes:

1) This is an RJ45 SHIELDED cable breakout to circuit board with screw terminals. It has holes to solder components.

**Jumpers Added
To Connect Grounds and
Shield Lines Together**

**Terminal Block Connects
to 1/8" Phone Plug Wires**

**Cut Trace by Scribing Circuit Board
With EXACTO Type Knife.**

YOU MUST CUT TOP AND BOTTOM OF BOARD!

Must Notch Board Edges To Allow Fit Within Width of Box

- Place Ink Lines Where Cut is to Occur
- Mark Front and Back Side
- Where Eye Protection! Cut Fiberglass Can Get Into Eyes!
- Use the Razor Saw to Saw a Line Across the Ink Guide Marks, Both Front and Back Side

Snap Off at Saw-Grooved Lines

- Grab the Corners with Needle Nose Pliers and Snap Off
- Use File to Clean Edges and Check for Fit
- File Additional Amount if Needed for Perfect Fit

RJ45 Square Cut Out (5/8" Square)

Overview

- Horizontally Center the Area to Be Cut, 5/8" Width Total. Observe Vertical Cut Out Begins at Top Edge of Box (Not the Lid).
- Xacto Brand Saw Used to Cut Vertical Lines for RJ45, 5/8" Depth (see next page)
- Scribe Used to Mark Horizontal Line
- Pliers Used to Wiggle Free the Plastic
- Make a Small Notch for Cable Exit at the Rear of Box Also

Square Cut Out For RJ45

Horizontally Center the Area to Be Cut, 5/8" Width Total. Observe Vertical Cut Out Begins at Top Edge of Box (Not the Lid).

Mark Lines Where Square Notch Is Needed for RJ45 and Saw Downward

DIY Project Completion

- Populate the Circuit Board with Components and Wiring Per Schematic
- Prior to Connecting 1/8" plugs, Slip Green and Pink Heat Shrink Tubing Over Cables to Indicate Headphone and Microphone Plugs, Respectively
- Connect the Two 1/8" Cables to the Terminal Strip Per the Schematic
- Once the Interface Box is Complete
 - Connect CS520 to Interface Box using an RJ45 plug to RJ45 plug
 - Connect the two 1/8" TRS phone plugs to your sound card device
- DIY Project is Complete!
